ABOUT ME

I am a fresh graduate software engineer with a bachelor's degree in software engineering from a reputable university. During my studies, I took an interest in developing software and technical skills, and I was always enthusiastic about developing modern applications and systems I am excited to develop more skills in software development and new technologies. I have the ability to learn quickly and adapt myself to different work environments. I am passionate about working in a dynamic environment and achieving shared accomplishments with my co-workers.

SOME PROJECTS

pos and inventory management system Jan 2021-Apr 2022

- Calculate the price of socks products and to issue price lists and invoices.
- Developed in PHP & MySQL (laravel framework)
- Customers who visit the online showroom can ask for a price list.
- The sales representative, by logging in, can provide the price list, add new products, and issue invoices with shipping cost fees and commission fees if they are required.
- Save and print all report

Online E-commerce Jan 2021-may 2022

- Developed in Codeigniter php
- The user can add, delete, and update a medicine & a customer.
- Also, the user can issue the sales invoice.
- Multiple users can login to this application and only the administrator can see a report to know the login and logout (date & time) for each user.
