

SHAKEEL AHMED

PROFESSIONAL LAND SURVEYOR / Gis Analyst

PERSONAL PROFILE STATMENT

I am a highly organized and responsible Land surveyor **14 years of experience** with excellent planning skills([Topography mapping](#),[geodatic calculation](#),[GPS/GNNS expertise](#),[autocad](#),[civil 3d](#),[GIS](#),[Lidar technology](#),[total station](#),[Drone surving](#),[static survey](#)) and experience of working on large scale infrastructure projects, civil engineering works and refurbishments on residential, commercial and industrials sites. I am also acutely aware of all aspects of construction. Geographic information systems (GIS) analysts manage and leverage GIS resources to create maps and graphic reports.

10 YEARS PROFESSIONAL EXPERIENCE (KSA)

4 YEARS PROFESSIONAL EXPERIENCE (UAE)

Company: - Al Hadaris compny pipeline /road project
02/2011 to 04/2014

Project: Sewer pipeline work sakaka aljouf

Project:king Abdullah road

Project :AL Jouf highway , king abdulaziz road , Khalid Bin Waleed road

Ensured that all required survey information was collected per project requirements.

- Worked with surveying staff architects and mapping staff to ensure consistency.
- Maintained an updated database of project-related geographical information.
- Prepared initial sketches of areas before any excavation work took place.
- Calculated height depth width distance and other key factors.
- Resulted any issues with surveying results in a timely manner.
- Clearly determine boundaries for each surveying assignment.

- Performed very detailed and accurate field surveys in compliance with all policies, laws, and procedures.
- Analyzed previous maps, physical evidence, and other documents.
- Experience using a GPS,TS system to collect land survey data.
- Maintained large databases and records, developed sketches, and operated professional equipment

Company: - louis berger international suadi Arabia pipeline /road project Al Baha

06/2014 to 09/2016

Project: Project Name:

Completion & Repairing of Road Project in albaha to aqeeq

- **Project: Doubling of Taif/Al-Baha/Abha Road Project Section 1**
- Hands-on experience in performing research and maintaining records for surveys
- Immense knowledge of efficient working of operational devices
- Exceptional knowledge of global positioning systems as per survey methods
- Ability to maintain survey equipments to ensure efficient working
- Ability to analyse client requirements and performed surveys accordingly
- Familiarity of performing topography and control surveys
- **Algebra, Geometry, and Trigonometry**
- Analysed data with help of various geographical information system and interpreted data.
- Utilized various survey instruments and maintained appropriate photogrammetric records.
- Prepared survey notes and made adjustments to the survey equipment's as per requirement.

SKILLS

- AutoCAD 2d/3d
- AutoCAD civil 3d
- Revit Architecture
- GIS Analyst
- Data collection
- Globle mapper
- Technical reports

SURVEY TOLLS

- GPS
- TOTAL SATION
- SURVEYRS LEVEL
- LDM
- 3D SCANNERS

Membership

Saudi council of Engineering

Pak council of engineering

Professional Education

- DIPLOMA CIVIL SURVEYOR
- DIPLOMA QUANTITY SURVEYOR
- DIPLOMA/CIVIL DESIGNING

Academic Education

Graduation Eco/Eng from
AJK UNIVERSITY

Computer courses

- ONE YEAR IT
- MS OFFICE PROGRAMS
- SQL /WEB /COMPUTER HARDWARE SOFTWARE /INTERNET USES

SKILLS

- Extensive knowledge of land surveying methods and measurement practices
- Solid understanding of geometry, engineering and trigonometry
- Strong familiarity with GIS applications and GIPs
- principles
- Impressive analytical and conceptual abilities
- Excellent internal and external communications skills
- Excellent knowledge of autocad

Company: - ABID ALI AL HABSHI (JEDDAH)

08/2021 to TILL A DATE

- **PROJECT :Implementation of the Road work Jeddah development of formula entrances**
- **PROJECT :Ajwaad Garden**
- **Execution of garden**
- **Plan and schedule survey teams' work in preparation of base maps, act as party chief on routine surveys**
- **Supervise, train and evaluate work of survey team members in the field and office as needed**
- **Analyze and review data gathered by field crews to ensure completeness and accuracy of survey information**
- **Use survey data to generate coordinate files for use in determining property lines, benchmarks, topographical features, cross-sections, field notes, quantities of materials used, and metes and bounds descriptions**
- **Experience operating electronic surveying equipment, computers, and programmable calculators**
- **Previous Land Surveying or Underground Utility Surveying experience**
- **Field work experience in land surveying**
- **Experience with construction staking.**

Company: - Globe Building Contracting Dubai 02/2016 to 06/2018

Projects: proposed B+G+6+R Labour Accomodation jabil ali industrial first

Projects: Moon plaza business bay B+G+40+R1+R2

- Preparing and maintaining sketches, maps, and reports of legal descriptions of surveys.
- Verifying data and calculations.
- Recording results of surveys.
- Calculating the measurements of sites.
- Analyzed data with help of various geographical information system and interpreted data.
- Supervised efficient working of marketing department and developed appropriate proposal
- Collecting land surveying data using gps,total station

Company: - Shield Contracting Dubai

08/2018 to 04/2020

Projects: Gulf paradise twin tower abu dhabi B4+G+18+R

Projects: 30 floor residential building khalifa street/al raha residential building

- repairing and carrying out land and structural surveys on a variety of structures, including grade 2 listed buildings and residential new builds
- Preparing project specifications, bills of quantities, schematic drawings, estimates, structural calculations and other relevant documentation for works involving refurbishment, remodelling and extensions
- Preparing and monitoring all surveying equipment
- Conducting measured building surveys; floor plans/elevations and sections
- Assessing the environmental impact of buildings and construction projects

GIS ANYAYST MY Resposbilites

Geographic information systems (GIS) analysts manage and leverage GIS resources to create maps and graphic reports. They collect and handle data, provide mapping services, perform technical research and analysis, and coordinate activities. GIS analysts are both subject matter experts and cross-functional leaders.
