About Me

An electrical engineer is a specialist in the design and maintenance of electrical and electronic systems and devices. It works to develop technical solutions for generating, transmitting, and using electrical energy in efficient and safe ways. He handles a variety of projects including renewable energy, industrial systems, electronic systems, and process control. It requires strong analytical skills and a deep understanding of physics, mathematics and electrical engineering.

Objectives

My goal is to join a work team that loves teamwork and needs my skills to achieve the company's goals, and to be an active member in a classy and successful system, through which I can develop my own capabilities and skills and I can participate in the growth of the entity to which I belong.
